Higher Education Summit 2012

'Improving Quality of Higher Education to drive Goa's Economy'

0900 hrs : 14 December 2012 : Vivanta by Taj - Panaji

FINAL PROGRAMME

Goa is a small state with high literacy and GDP of near 3500\$. The economy is however in the primary and value add stage, be it in manufacture or services sector. The younger generation, nearly 22000 who enter the job market each year, aspire for well paying jobs and these are not easily available in the state today. The problems faced by Primary activities such as mining are troubling the state economy.

The solution is to train our students to be eligible for more than Rs. 2.0 lakhs p.a. jobs and attract better industries that use them to make Products, lead Research and Development and Innovation. It is these sectors that will meet the aspiration of our young generation and also meet with approval from the Goan people at large.

Goa needs to move from 30% graduate enrollment to emulate Korea with 90% graduate enrollment with matching abilities. To move our higher education system to this path CII has organized the Summit to drive the point that Goa has no option than creating better equipped students if we are to keep progressing sustainably.
