20th CII Health Summit 2023

R.A.I.S.E. HEALTHCARE

Responsible I **A**ccessible I **I**nnovative I **S**ustainable I **E**quitable

25 November, New Delhi

Programme *(as on 16-11-2023)*

Day 1 (By Invitation Only)

Day 1 : Friday, 24 November 2023

1300 -1400 hrs	**Lunch**
1400 – 1730 Hrs	**Workshop**
1800 – 1900 Hrs	**Q&A**

Day 1 : Saturday, 25 November 2023

1000 -1045 Hrs : Inaugural Session – 20th CII Health Summit 2023

Release of Report	*CII - McKinsey report on India's healthcare sector, 2023*

1100-1200 hrs **Plenary Session 1:** **Perspectives on Indian Healthcare – Measuring Challenges and Tapping Opportunities**

1200 -1300 hrs **Plenary Session 2: Building a Resilient and Inclusive Future Ready Health Care**

The global healthcare sector faces several challenges, including ageing populations, tighter budgets, a shortfall in medical staff, higher patient expectations. Health needs are becoming more complex. Hospitals should broaden the healthcare horizon beyond buildings to institute a healthier and more resilient population with better endurance against infections, ailments, or future pandemics. One big change in experience will be that for many things that we go to a hospital for at the moment, we will not go to a hospital. We will instead just do it remotely, or we might go somewhere else that is not the big, huge building in the middle of town.

At the same time, technological advances are changing healthcare delivery. In this edition, *The Next Normal* explores how hospitals will innovate in the coming decade—and what it will mean for both patients and healthcare professionals. **In this session, we aim to discuss-**

- Changing Approaches to Healthcare Delivery
- Design based on - pandemic preparedness, climate resilience, connectivity with the rest of the healthcare ecosystem, flexibility, digital transformation, and patient centricity.

20ᵗʰ CII Health Summit 2023

R.A.I.S.E. HEALTHCARE

25 November, New Delhi

- Integrative approach of care delivery

1300 -1400 Hrs   Networking Lunch

1400 – 1445 hrs

Plenary Session 3: The Innovation Process: From Ideas to Implementation

Innovation may involve identifying healthcare challenges or problems that need a solution, and proposing ideas that can address them. Ideas can be sourced from various stakeholders, including healthcare service providers, patients, academic researchers, Pharma, MedTech, Digital health, Health Tech, Biopharma. Innovation involves a series of steps from ideation to implementation that require collaboration and engagement of various stakeholders.

There are many challenges in between innovation to implementation i.e., Lack of funding, Regulatory hurdles, Resistance to change, Data privacy and security concerns, Limited collaboration, etc. Overcoming these challenges requires a collaborative, cross-sectoral approach that includes all relevant stakeholders. Successful healthcare innovations require significant investment, regulatory clarity and reform, strong data privacy protection, greater collaboration, and a willingness to embrace change.

In this session, we aim to discuss-

- Building a future-ready, resilient health system
- Innovation process in health for sustainable solutions
- Strategies to Implement Innovations
- Potential Challenges and Benefits of Innovation Implementation
- Strategies for advancing research and development to improve access to care and health outcomes.
- Tech fusion for improved health outcomes.

1445 – 1515 hrs

Plenary Session 4: New Paradigms to Meet Workforce Shortages

With a shortage of health workers in various specializations, cross-training, interdisciplinary training, and use of technology can be an effective solution to fill the gaps in the workforce. As the demand for healthcare services increases, multi-skilling offers a practical approach to addressing the workforce shortage. **This session will explore the benefits of –**

- Cross-training, its challenges, and strategies to implement successful cross-training programs in healthcare organizations.

- Role of technology in healthcare, its impact on the workforce, and opportunities for healthcare organizations to embrace technology and prepare for the future.
- Benefits of multi-skilling, how to identify the skills needed, and the strategies to implement successful multi-skilling programs.

1515 – 1600 hrs	**Plenary Session 5: Integrating and Accelerating Health Economy & Finance** Healthcare delivery continues to be a significant challenge worldwide. However, combining health economy, finance, and policy provides a critical pathway for achieving a balanced and sustainable model. **In this session, we aim to discuss-** • The practical strategies for stakeholders to achieve a sustainable healthcare delivery system that meets the needs of patients and providers while achieving efficient and affordable care. • Alternative models of health financing • Innovative models of Health Insurance
1600 – 1630 Hrs	**Plenary Session 6: Partnering to improve Equity in Healthcare** **In this session, we aim to discuss-** • Addressing health equity with interdisciplinary collaboration. • Manage or engage in partnerships that serve public health system objectives. • Embrace new capabilities and a new culture—a new operating model for Pharma, Biopharma, and Biotech • Engaging communities and stakeholders to design, build, and implement health technologies, tools, and approaches.
1630 -1700 Hrs	**Valedictory: Tomorrow's World -Towards Smarter, Innovative, and more personalized Care**
