India as an emerging market with one sixth of the world's population continues to be relevant in the global medical technologies space, not just from a market point of view, but also as a global hub for innovation and manufacturing given its low cost yet trained human resource pool. The CII Vision document released in 2014 during the 7th Medical Technology Conference envisioned a $50 billion opportunity in the medical technology space in India, and was followed by a detailed Ten Point Agenda released in 2015 during the 8th Medical Technology Conference. It helped in building a roadmap and voicing the Industry needs and demands from all stakeholders with focus on Manufacturing, Innovation, Regulation, Adverse environment and Skill building.

We believe an efficient and sustainable medical technology ecosystem will need an equal focus on developing world class facilities along with discovery and updation of technology in line with global trends, fostering local innovators to co-exist and draw upon success stories of global MNCs thereby creating a dynamic market with focus on quality, safety, clinical outcomes and cost effectiveness. Achieving this will require all the stakeholders to work together to ensure basic industry needs are met and to ensure the industry can take the first steps in the right direction and build a global hub for medical technology in India.

Based on this background, the 9th Medical Technology conference scheduled on 2nd September 2016, at Hotel ITC Maurya, New Delhi, would focus on progress against these ten point agenda. The conference will have participation from the Central Government and the State Government, Industry participants from the Medical Technology Sector, health fraternity and thought leaders from across the globe are expected to attend the event.

**Industry Segments who will find value in participation**

- Indian and Multinational Medical Technology & Equipments manufacturers
- Importers & Exporters Large, Medium and Small Healthcare Deliverers
- Diagnostics Kits
- Electronic Medical Equipments
- Hospital Furniture
- Medical Waste Management
- Hospital Staffing service
- Surgical equipments and accessories
- Medical Textiles and Fabrics
- Medical care Finance
- Health Insurance
- Service providers
- Consulting firms
- Telemedicine equipments

**Plenary Session I : Streamlining technology and manufacturing – How Global Markets have achieved success in Medical Technology**

**Plenary Session II: Policy Changes that will help “Unlock” Industry growth**

**Plenary Session III: Creating Enablers for Growth by Improving Patient Access and Reimbursement**

**Plenary Session IV: Innovating Medical Technologies for the Future**

**Focused Audience**

- CMD’s, MDs & CEOs
- CIO and CTO’s
- Healthcare Professionals
- Care Service
- Medical Directors
- Hospital Directors
- Diagnostic Centres
- Consultants/ Planners - Marketing & PR
- Bio - Medical Engineers
- Nursing Home Practitioners
- Hospital Administrators
- Procurement and Purchasing
- Exports
- Service and Healthcare Groups
- Heads R & D and Manufacturers
- Investors Healthcare
- Clinical Laboratories

**Participation Fee**

- Rs 4000 per Delegate for CII Members
- Rs 5000 per Delegate for non CII Members
- US$150 for International Delegates

Nominate 3 or more Delegate from your Organisation and One Delegate will be complimentary*
